

NO SOCIALISM ON A DEAD PLANET

Anti★Capitalist Resistance
is an **ecosocialist** organisation.

We are revolutionary socialists fighting for a fundamental change in our relationship with the natural world from the current one of exploitation and alienation which is at the root of the current environmental cataclysm. Capitalism is based on an endless search for profit and growth, regardless of the waste, pollution and destruction of habitat and community this causes.

We are **active in our communities and trade unions against predatory fossil capitalism** – from the plans for a new coal mine in Cumbria to the expansion of incineration throughout England; from HS2 destroying biodiversity and communities to the distraction and delay of unproven techno-fixes.

We **campaign for positive policies**, such as a Socialist Green New Deal that includes a major programme of retrofitting homes, the ending of all new extraction of fossil fuels, free accessible public transport, and much more. For these measures to be effective, workers and communities must be fully involved in planning their implementation locally, nationally, and on a world-wide scale.

We support **direct action targeted against major polluters** and to force governments to act in response to the climate emergency. At the same time, we support the sort of **mass action** that the COP26 coalition has been working for on 6 November, as well as trade union mobilisations.

We **organise with others in common campaigns** around these and other demands. We hold discussions, in our own name or together with others, to develop and promote ecosocialist ideas.

ANTI★CAPITALIST RESISTANCE

FIGHTING DISASTER CAPITALISM WITH ECO-SOCIALISM

Hi! We're **Anti★Capitalist Resistance**, a group of revolutionary Marxists who define ourselves as ecosocialists. We believe that capitalism is killing us and the planet and has to be stopped.

The world is facing an unprecedented interrelated crisis with the coronavirus pandemic, the accelerating climate disaster, creeping fascism, and an economic crash.

We are here to demand:

- Action from governments based on redistribution of resources
- No to false solutions and unproven techno-fixes
- Reparations to the Global South where the majority of people who suffer the most from the impacts of climate disaster are those least responsible for the problems
- Start the Just Transition now
- That the labour movement make environmental justice core to its organising

The world capitalist system is in deep crisis and faces growing resistance from below.

Extreme inequality is out of control. There are more billionaires than ever before. Meanwhile, the world's poorest get even poorer as governments bail out private corporations and cut or sell off essential services. This is no accident or just the result of greed. It is built into the logic of capitalism, a system built on profit and exploitation of people and planet.

Change is urgent.

We need a mass movement to win victories for democracy and social, climate, and economic justice. We must organise for action now, but also for system change.
