

# FREE, FREE PALESTINE!

## INTERNATIONAL SOLIDARITY WITH THE PALESTINIAN PEOPLE

**Anticapitalist Resistance** [www.anticapitalistresistance.org](http://www.anticapitalistresistance.org)

# No climate justice without Palestinian liberation!

*The Palestine Institute for Public Diplomacy issued this statement for the recent COP30 summit for practical solidarity with the Palestinian people.*

For nearly two years, Israel has waged a livestreamed genocide against Indigenous Palestinians in Gaza and across historic Palestine, devastating lives, land, and ecosystems. UN experts have described Israel's crimes as including domicide, urbicide, scholasticide, medicide, cultural genocide and ecocide. In September 2025, the UN Commission of Inquiry confirmed that Israel is committing a genocide in Gaza.

This genocide is inseparable from environmental destruction:

- Over 100,000 tons of bombs dropped, with a carbon footprint greater than the annual emissions of many countries.
- Widespread contamination of soil and water with depleted uranium, white phosphorus, and heavy metals.
- 80% of Gaza's cropland destroyed, creating famine and long-term ecological collapse.

This genocide is built in 77 years of settler-colonialism, ethnic cleansing, apartheid and illegal occupation, which Israel has been allowed to perpetrate against our people through the complicity of states and corporations. Ending complicity is the first duty of solidarity. Energy, water, and agribusiness corporations are complicit—supplying fuel, coal, and technologies that enable Israel's war machine, settlements, and apartheid system that enable Israel's war machine, illegal occupation, and apartheid system, are central in this chain of complicity.

## Our Demands for COP30 and Beyond

We, Palestinian grassroots, environmental, and human rights organisations, call on climate justice, human rights, trade unions, and solidarity movements to take action:

## Global Energy Embargo for Palestine

Pressure Brazil as COP30 host to end all oil, coal, and fuel exports to Israel.

Mobilise globally—especially in Brazil, Colombia, South Africa, Nigeria, Greece, Cyprus, Turkey, Azerbaijan, Kazakhstan, and Gabon—to stop energy shipments to Israel.

- Target energy corporations including Glencore, Drummond, BP, Chevron, ENI and SOCAR that are fuelling genocide, apartheid and illegal military occupation.
- Oppose the EU-Israel gas agreements that legal experts warn risk breaching international law by entrenching Israel's unlawful occupation and apartheid regime

**AntiCapitalist Resistance** was formed in 2021 by the merger of two groups. We came together in a commitment to fight racism and creeping fascism and all the reactionary ideas that divide us. We campaign to promote internationalism from below in solidarity with Palestinians and Ukrainians resisting imperialist occupation and annexation.

We stand for ecosocialist revolution — urgent action to stop climate disaster and a mass movement to empower people to take down capitalism and create a more democratic world.

We support working people organising alongside the socially oppressed so we can advocate for a universal idea of freedom from exploitation, discrimination and bigotry.

We are part of the **Fourth International**, founded in 1938 by the revolutionary Leon Trotsky to organise against imperialist war, capitalism and Stalinism. We reject the idea that the Soviet Union was properly socialist.

Our vision of ecosocialism is a society based on democratic planning to provide a good life for everyone within sustainable planetary limits.

## End Water Apartheid

Terminate all agreements with Mekorot, the Israeli state water company that cuts off water to Gaza and sustains illegal settlements.

Stop new projects and expose water corporations that greenwash apartheid.

## Stop Agribusiness Complicity

- Boycott and divest from Netafim, Adama, ICL Group, and other agribusiness firms profiting from settler colonialism, pesticides, and land theft.
- Connect food sovereignty struggles worldwide to Palestine's struggle for land and life.

## Ban Israel from COP30

Israel, found guilty of apartheid and genocide (including ecocide), should not be legitimised as a participant in a UN climate conference. Its presence undermines the remaining credibility of COP30 - Civil society must demand Brazil and the UNFCCC exclude Israel until it fully complies with international law and respects Palestinian rights, including the right of refugees to return and receive reparations.

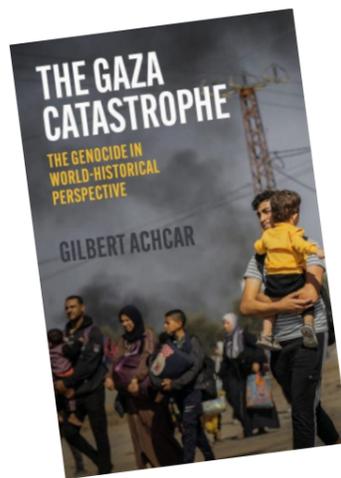

Climate justice and Palestinian liberation are inseparable. The corporations and states profiting from fossil fuels, militarism, and ecological destruction are most often the same ones enabling genocide.

We urge all movements gathering in Belém for COP30 to:

Strengthen the global BDS movement as the most effective form of solidarity, targeting complicity and espousing meaningful accountability.

Build joint campaigns linking climate justice with anti-colonial and anti-apartheid struggles.

**No climate justice without Palestinian liberation!**

**Book Launch: Gilbert Achcar's  
The Gaza Catastrophe – The  
Genocide in World-Historical  
Perspective**

**Wednesday 10 December 7pm**

Venue: Somers Town Community centre,  
150 Ossulston Street, NW1 1EE  
(Nearest tube is Kings Cross and Euston  
station)

# ANTI★CAPITALIST RESISTANCE

Capitalism is not eternal, it can - and must - be overthrown.

**We stand for an ecosocialist society, based on democratic planning, workplace self-management, production for human need, freedom from social and class oppression, universal basic services and free time for the full development of our desires and capacities**
